Job Title: Interface Engineer

Location: Portland, Ore.

Compensation: DOE

One of our clients is seeking a full-time, front-end web developer with a solid understanding of standards-compliant (X)HTML/CSS with the ability to quickly slice up and implement designs created in Photoshop or Illustrator. General knowledge of Adobe software is a must. Experience working with dynamically-driven content and manipulating the DOM with jQuery or javascript is a plus. An eye for aesthetics and design is appreciated.

Responsibilities:

You Will:

- Perform your tasks quickly and efficiently, meeting all deadlines in a fast-paced work environment.
- Cross-browser test your code, support IE6.
- Accurately translate beautiful designs to the web, with pixel-perfect precision.
- Possess experience hand-coding websites.
- Be comfortable working on a Mac.
- Understand modern font/image replacement techniques.

You Won't:

- Ever use the words WYSIWYG or Comic Sans in a positive way.
- Code a site without giving consideration to text-resizing and other accessibility issues.
- Use tables to layout anything other than tabular data.
- Use a single unnecessary div, span, class, id... you get the idea.

If you believe that this is the right opportunity for you, then wait no longer. Apply today!

Job Title: Project Coordinator

Location: Beaverton, Ore.

Compensation: \$15-\$17/hr.

One of our clients is a leading provider of integrated technology products and services for the legal profession. Their software applications and web-based platforms offer case management and document management solutions for electronic discovery, legal notification, claims administration, and controlled disbursement.

Position Summary

The individual in this position manages the administrative details and facilitates the building, maintaining, and updating of a client's database in class action area. This individual will manage an administrative team of between two and six claims processing staff, compile and report statistical data pertaining to the case(s) and communicate the status of the case(s) to all interested parties. Class action cases range in size from several hundred thousand dollars to cases that exceed hundreds of millions of dollars in potential payouts and penalties. The number of potential claimants can range from just a few, to over one million. The Account Manager and his/her team are expected to handle multiple cases simultaneously.

Key Job Duties and Responsibilities:

- Provides input in the development and implementation of case processing rules and data processing procedures.
- Supervises claims processing the case(s) by monitoring the completion and accuracy of the claims processors on the case, and prioritizing the work flow which may include adjusting claims processing procedures and personnel as necessary.
- Coordinates mailings and mail receipt.
- Prepares case scripts for the call processing staff.
- Provides for the efficient identification and compilation of class action claimants in a case.
- Verifies the details and the accuracy of claimants claim in the case.
- Provides for the reporting on the status of each claim by analyzing the data collected.
- Communicates to all interested parties in the case either verbally or by mail. These interested parties include but are not limited to the attorney firm representing the plaintiffs, the attorney firm representing the defending company, court personnel including judges, attorneys, and clerks, claimants in the case, class action team members, and management.
- Provides for value added services while the case is in our custodial care. These services may include but are not limited to, special reports, mailings of notices, and the coordination of the distribution of funds.
- Supervise between two and six associates in the class action area and carry out supervisory responsibilities in accordance with the organization's policies and applicable laws. Specific responsibilities include training, coaching and rewarding associates; planning, assigning, and directing work; appraising performance; performance management which may include counseling, discipline or termination; addressing concerns or complaints and resolving problems.

Minimum Qualifications

To perform this job successfully, an individual must be able to perform each essential job duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions upon request.

Education and/or Experience:

This position requires a bachelor's degree from an accredited four-year college or university and one-to-two years related experience or training, including prior staff supervisory responsibility. An equivalent combination of education and experience will be considered.

Language Skills:

You must have the ability to read, analyze, and interpret general business periodicals, professional journals, technical procedures, or governmental regulations. Candidate should have the ability to write reports, business correspondence, and procedure manuals while they can effectively present information and respond to questions from groups of managers, clients, customers, and the general public.

Mathematical Skills:

The successful candidate must have the ability to calculate figures and amounts such as discounts, interest, commissions, proportions, percentages, area, circumference, and volume. Candidates should also be able to apply concepts of basic algebra and geometry.

Reasoning Ability:

It is essential that the Account Manager have the ability to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists. The ability to interpret a variety of instructions furnished in written, oral, diagram, or schedule form is also required.

Physical Demands:

The physical demands described here are representative of those that must be met by an associate to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. While performing the duties of this job, the associate is regularly required to sit; use hands to finger, handle, or feel; and continuously talk or hear. Regular and dependable attendance is an essential function of this position. Associates in this position are regularly required to reach with hands and arms lift and/or move up to 15 pounds and occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, and ability to adjust focus.

If you believe that this is the right opportunity for you, then wait no longer. Apply today!

Job Title: Software Developer- Reputation Technology

Location: Portland, Ore

Compensation: DOE

Job Summary:

This company is in the business of making the Internet a safer place. We've spent the last six years developing award-winning technologies that now stop more than 100,000 fraudulent activities every day for hundreds of corporate customers. We help protect users of financial services, games, social networks, and commercial sites from account takeover, and we protect the companies providing those services from many other kinds of fraud.

Our challenge is to make amazing tools and help people put them to work. Today we're looking for help in making our offering more effective and in making our service scale to be able to handle every important transaction that crosses the Internet (yes, really!).

Each of us are extraordinarily self-directed and self-motivated. We work well as a team and cede authority to each other with ease and regularity. That also means that enormous responsibility falls on each of us to ensure that we are doing The Right Thing. We pride ourselves on alacrity, on doing things quickly and well, and on keeping things as simple as possible.

Who You Are

Over the last 2-4 years, you've developed your skills in creating loosely-coupled, event-driven messaging systems, and you are looking to be a part of a fast-paced, highly motivated team of developers in creating the next generation of intelligent fraud fighting systems. You understand that the way things have always been done isn't necessarily the way they should always be done, and that your brilliant idea today can still be made better tomorrow. You understand the importance of committing to a date and then hitting it, and you love the energy of working with an energized team of enthusiastic doers.

Come work with us, and you will be an integral part of the ongoing development of a globally distributed reputation management system, and you'll always be on the lookout for ways to outthink and outsmart the bad guys. Your daily activities will include working closely with members of an agile development team in understanding requirements and expectations, planning and estimating development tasks, and cranking out beautiful code that makes our customers sing and fraudsters weep with frustration.

We want someone who is passionate about the work; not just about writing software, but about making amazing systems that hum while they thrill our users. Our customers, the product, and the process matter to you - in that order.

Qualifications

We expect you to be comfortable with:

- Java
- HTML
- JavaScript

You also have some familiarity with:

- Linux
- Perl
- Object-Oriented Programming

And we smile when we see experience with:

- SQL
- The finer points of HTTP
- XML and JSON
- Large scale, high volume, high availability applications
- Dynamic languages like Ruby, Python, Scala or Groovy
- Messaging-based architectures

If you believe that this is the right opportunity for you, then wait no longer. Apply today!

To Apply:

1. Send your resume to pdxrecruiting@campuspoint.com with the position title in the subject line and education listed on your resume **AND/OR**
2. Go to www.CampusPoint.com
3. Click on the Portland

Job Title: Technical Support Specialist

Location: McMinnville, Ore.

Compensation: DOE

About the Company

We are looking for a Technical Support Specialist to provide technical user support to all staff. This position requires superior customer service skills and a commitment to continuous improvement. This Company is a plastic tubing manufacturer that employs over 100 people in McMinnville, OR. As North America's largest independent manufacturer of plastic tubing, we are proud of our people and our products, and we strive to implement process improvements daily. This position reports to the Information Technology Manager and provides direct support to all areas of the business.

Responsibilities

- Provides technical support to end users, resolving issues and escalating problems as appropriate.
- Ensures all communications are conducted in a timely and respectful manner.
- Oversees the daily performance of computer systems and office equipment.
- Operates as a front-line responder to all user inquiries with the ability to install and perform minor repairs.
- Develops training materials and procedures, and trains users in the proper use of hardware or software.
- Reads technical manuals, confers with users, and conducts computer diagnostics to investigate and resolve problems or provide technical assistance.
- Maintains records of daily data communication transactions, problems and remedial actions taken, or installation activities.
- Analyzes network data to determine network usage, disk space availability, and server function.
- Configures and defines network parameters.
- Configures security settings, WAN or LAN equipment, and documents network support activities.
- Identifies the causes of networking problems, using diagnostic testing software and equipment.

Qualifications:

- 2+ years related PC and network experience and/or training, or equivalent combination of education and experience
- Knowledge of Microsoft Office Suite
- Ability to work effectively as part of a team, as well as independent of direct supervision
- Ability to prioritize tasks and maintain system and equipment updates
- Familiarity with SQL, MAS500, Crystal Reporting, Citrix, Cisco, and Exchange Server

If you believe that this is the right opportunity for you, then wait no longer. Apply today!

To Apply:

1. Send your resume to pdxrecruiting@campuspoint.com with the position title in the subject line and education listed on your resume **AND/OR**
