Computational Science Graduate Research Assistant Position Available at Central Washington University

Central Washington University’s Computer Science Department has a grant funded research position for a Master’s degree candidate starting as early as Spring Quarter 2021 (March 30th). The position will provide two years of funding plus a tuition waiver. US citizenship is required.

The selected student will work on Visual Knowledge Discovery and Natural Language Processing (NLP) which are in the overlap of machine learning/AI and visualization. The student will join a research team in the lab of Dr. Boris Kovalerchuk (http://www.cwu.edu/~borisk/) to contribute to a grant funded project the position expects that candidates have completed at least the following undergraduate courses: data structures, algorithms, and programming languages. Skills in computer graphics, machine learning, visualization, and NLP are preferred. Programming skills in C++, Java and Python are expected. Candidates must have a BS in computer science with a GPA over 3.0.

To be considered, a student must apply to CWU’s graduate program at: http://www.cwu.edu/masters/apply-cwu-graduate-school

More information about the MS in Computational Science can be found at: https://www.cwu.edu/computer-science/computational-science-masters-degree-program
